

L. PARKER DYER

LEAD FRONT END DEVELOPER

+1 604.841.8970 | dyer.lp@gmail.com | Vancouver, BC | parkerdyer.dev | linkedin.com/in/parkerdyer

Senior Software Engineer with 10+ years building and scaling front end architecture, design systems, and engineering teams. Proven leader of cross-functional teams, mentoring engineers to promotion and delivering enterprise-grade platforms for Fortune 500 clients. Deep expertise in React, Next.js, and TypeScript, with hands-on experience in accessibility, CI/CD ownership, and technical hiring — and growing full-stack range through Node.js and NestJS.

CORE COMPETENCIES

Leadership: Team Leadership & Mentoring • Technical Hiring & Interviewing • Agile/Scrum • Cross-functional Collaboration • Engineering Onboarding

Front End: JavaScript/TypeScript • React • Next.js • HTML5 • CSS/SCSS • GraphQL • Design Systems • Accessibility (WCAG)

Backend & Tooling: Node.js • NestJS • Webpack • Rollup • Jest • Playwright • Git • GitHub Actions • GitLab CI/CD

RELEVANT EXPERIENCE

TELUS Digital / WillowTree | Vancouver, BC / Columbus, OH

Senior Software Engineer

January 2022 — Present

- Lead a 6-engineer team delivering a comprehensive design system for a Fortune 500 client, driving UI consistency and faster feature delivery across product teams.
- Mentor and coach junior developers on architecture, code quality, and career growth; both directly mentored engineers earned promotions within 18 months.
- Own GitLab CI/CD pipelines and GitHub Actions workflows across multiple projects, improving build reliability and deployment velocity.
- Drive Agile process end-to-end — sprint planning, estimation, and roadmap prioritization — in close partnership with product and design.
- Helped stand up WillowTree's Vancouver office, establishing early team practices and engineering culture.
- Lead technical interviews and hiring decisions for mid- and senior-level front end candidates.

Platform Software Engineer

May 2018 — January 2022

- Built and maintained platform-level front end features and internal tooling in Columbus, OH prior to relocating with the company's Vancouver expansion.

Optum for Workers' Compensation | Columbus, OH

Web Developer

November 2015 — May 2018

- Architected an interactive JavaScript mapping solution used to visualize body systems.
- Led accessibility remediation efforts to bring the site into compliance with accessibility standards.
- Designed and implemented the front end architecture for a full site rebrand, including legacy system integration.
- Planned and delivered quarterly site enhancement roadmaps in partnership with stakeholders.
